

SHIVAM SOFTWARE

ABSTRACT :-

SYSTEM OVERVIEW:-

Sivam software package is a highly scalable product for Hindus. It offers a complete automation of booking various pooja and hall for various occasions. It can also be used for donating money for various functions in the temple. Sivam system software is excellent in pooja booking, hall booking, booking ramayanam reading and donating money for various Utsava functions. Users can also view the shanthi details. Adding children to Balavedhi and participate in different programs conducted by the balavedhi.

SYSTEM STUDY:-

I have done system study by visiting in my nearby temple and make a complete study about the pooja booking, hall booking details, booking ramayana reading and donations.
